

AI-powered Career Coach Assistant

Shahad Almowaled

Submission Date: 19/11/2025

Project Overview

This project demonstrates the development of a generative AI-powered Q App using **Amazon Q Business**. The application analyzes uploaded CVs and job profiles to identify skill gaps and recommend personalized training paths. It integrates advanced interaction components, secure access controls, and dynamic data sources including Amazon S3 and static PDFs.

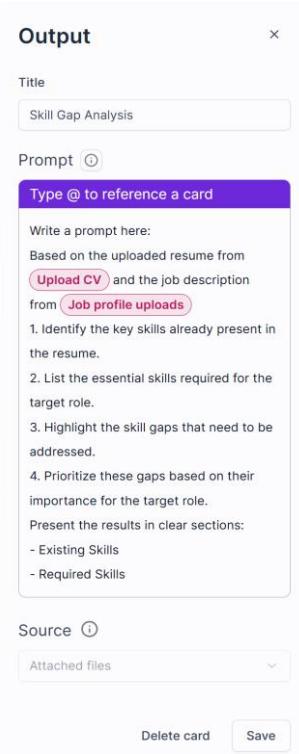

Core Functionality

This part summarizes the main features, including skill gap detection and personalized training suggestions to support career growth.

- **Skill Gap Analysis:** Input cards for CV and job profile uploads; output card displays skill gap results.

The image shows three separate input cards side-by-side, each with a close button (X) in the top right corner.

- File upload (Left):** Title: "Upload CV". Default file - optional: "sample-cv-01.docx". A note says "Uploaded files will be accessible to users of published Q Apps". A checked checkbox says "Allow override of default file". Buttons: "Delete card" and "Save".
- File upload (Middle):** Title: "Job profile uploads". Default file - optional: "Sample-job-...". A note says "Uploaded files will be accessible to users of published Q Apps". A checked checkbox says "Allow override of default file". Buttons: "Delete card" and "Save".
- Text input (Right):** Title: "Career Coach Input". Placeholder - optional: "placeholder". Default value - optional: "Tech field — specifically Data Science. The learner has strong Python skills but limited experience with machine learning". Buttons: "Delete card" and "Save".

- **Training Recommendations:** Output card suggests relevant training based on identified gaps.

CareerCoachAssistant ⓘ

AI-powered assistant to automate resume review, skill gap analysis, and personalized training recommendations for learners at Career4All.

Advanced Interaction Components

This part describes interactive elements such as personalized schedules and coach recommendations that enhance the user experience.

- **Suggested Schedule Output Card:** Displays a personalized training timeline.

- **Coach Recommendation Input Card:** Allows users to request tailored advice from specific coaches.

- Functionality Verified:** Screenshots of both components working correctly.

Skill Gap Analysis: John Doe's Resume vs. Cloud Solutions Architect - Generative AI Role

Existing Skills

Based on John Doe's resume, the following key skills are present:

- Cloud Computing (AWS Certified)
- AWS Certified Cloud Practitioner certification
- Software Development
- Database Management
- System Design
- Problem-Solving & Debugging
- Web Development
- Team Collaboration

Schedule

Weekly Learning Schedule for AI Skills Development

Month 1: Foundation Building

Week 1

Skills Development: AI Fundamentals, Problem-Solving Techniques

- Monday-Tuesday (3 hours):** Introduction to AI problems and characteristics [\[1\]](#)
- Wednesday-Thursday (4 hours):** Study production systems and control strategies [\[1\]](#)
- Friday-Sunday (3 hours):** Explore forward & backward chaining reasoning [\[1\]](#) **Milestone:** Understand basic AI concepts and problem-solving approaches [\[1\]](#)

Run **Reset**

Training Recommendations

3-Month Training Plan for AI and Cloud Skills Development

Month 1: Foundation Building

Week 1-2: Artificial Intelligence Fundamentals

- Take "Introduction to Artificial Intelligence" course covering AI problems, characteristics, and problem-solving techniques [\[1\]](#)
- Learn about search strategies including breadth-first, depth-first, and intelligent searching methods like Best First Search and A* algorithm [\[1\]](#)
- Study knowledge representation fundamentals including First Order Predicate Calculus, Resolution, and Logic Programming [\[1\]](#)

Week 3-4: Programming for AI

Data Source Integration

This explains how different files, including PDFs and S3 data, are connected to the system to keep information updated.

- **Static PDF Upload:** Course catalog uploaded and synced.
- **Amazon S3 Integration:** Training catalog file uploaded and synced.
- **Screenshots:** Confirm successful sync for both sources.

Automatic Updates

This part covers how the app automatically synchronizes data on a schedule to ensure accuracy.

- **Scheduled Sync:** Daily sync configured for S3 data source.

The screenshot shows the Amazon Q Business Data sources page. At the top, it displays the account ID: 0615-7291-7046 and the URL: vocabs/user4372529ffa5472e-1278-11ec-ba40-3... The navigation path is: Amazon Q Business > Applications > CareerCoachAssistant > Data sources > CareerCoach_Datasource.

Data source details:

- Name: CareerCoach_Datasource
- Status: Active
- Description: -
- Type: S3V2
- Data source ID: 6e6355d8-9990-4d59-89e8-35d87bb3d093
- IAM role ARN: arn:aws:iam::061572917046:role/QBusinessDataRole
- Last sync status: Successful - service is operating normally
- Last sync time: Nov 02, 2025, 5:56 AM GMT+3
- Current sync state: Idle

Sync history (2):

Status / Summary	Start time	End time	Total items scanned	Failed	Logs	Actions
Completed	Nov 02, 2025, 5:56 AM GMT+3	Nov 02, 2025, 5:59 AM GMT+3	7	0	Service is operating normally	View report
Completed	Nov 01, 2025, 5:57 AM GMT+3	Nov 01, 2025, 6:00 AM GMT+3	5	0	Service is operating normally	View report

Security and Moderation

This section outlines permission controls and moderation tools that protect data and prevent misuse.

The screenshot shows the Amazon Q Business Data sources page. A green success message at the top states: "You successfully synced the following data source: 'CareerCoach_Datasource', at start time Nov 01, 2025, 5:57 AM GMT+3." Below the message, the sidebar shows the navigation path: Amazon Q Business > Applications > CareerCoachAssistant > Data sources.

Data sources info:

- How it works:**
- Index:**
 - Index name: CareerCoachIndex
 - Index provisioning: 1
 - Index ID: 89157681-3e3c-44bf-9780-326c077d9c54
 - Index status: Active
 - Document count: 0
 - Retriever ID: 8966ad53-6963-4861-99df-8e91b76fcff4
 - Last modified time: October 04, 2025, 19:07 (UTC+03:00)
 - Storage used: 0 Bytes
 - Retriever: Native retriever: Starter

Data sources (1/1) Info:

Name	Source	Data sourc...	Last sync ...	Last sync ...	Current s...	Access Co...

- Access Control:** ACL file uploaded for CareerCoaches group (users: career.coach.one, career.coach.two).

Screenshot of the AWS CloudShell interface showing the configuration of an Amazon Q Business Data Source.

The URL in the browser bar is: [Amazon Q Business > Applications > CareerCoachAssistant > Data sources > CareerCoach_DataSource > Update S3](#)

The configuration page shows the following sections:

- Access control list (ACL) configuration file location - optional**: A text input field containing "s3://bucket-career-coaches/course_access_acl.json".
- Metadata files folder location - optional**: A note indicating it's optional and describes the folder containing metadata JSON.
- Filter patterns - optional**: A note indicating it's optional and describes patterns for folders, file types, or specific files.
- Multi-media content configuration - optional**: A note indicating it's optional and describes media content settings.
- Advanced Settings - optional**: A note indicating it's optional and describes advanced settings.

Sync run schedule:
Tell Amazon Q Business how often it should sync this data source. You can check the health of your sync jobs in the data source details page once the data source is created.

Frequency: Select how often you want your data source to sync. Set to "Daily".

Start time: Set to "02 : 56 (UTC)" which corresponds to "Local 05:56 AM (UTC+3)".

CloudShell Feedback: Shows the following JSON code:

```
1 [{"keyPrefix": "s3://bucket-career-coaches/data/Data/Security/", "aclEntries": [{"Name": "CareerCoaches", "Type": "GROUP", "Access": "ALLOW"}]}, {"keyPrefix": "s3://bucket-career-coaches/data/Data/Medicine/", "aclEntries": [{"Name": "career.coache.two", "Type": "USER", "Access": "ALLOW"}, {"Name": "career.coach.one", "Type": "USER", "Access": "DENY"}]}]
```

Access Denied case (**career.one.coach** user):

The screenshot shows the Career Coach Assistant interface. On the left is a sidebar with icons for Chat, Library, Apps, Feedback, Info, and Log out. The main area is titled "Career Coach Assistant". A user icon shows a message: "med 602". The AI response says: "No answer is found. Generating an answer based on what I know... I apologize, but I notice this query "med 602" lacks sufficient context for me to provide a meaningful response. Could you please provide more details about what specific information you're looking for? This could refer to: 1. A medical course code 2. A medication number". Below this is a search bar with tabs for "Company knowledge" and "General knowledge", and buttons for "Ask a followup question", "Plugins", and "Advanced search". A note at the bottom states: "Amazon Q Business uses generative AI. You may need to verify responses for accuracy. AWS Responsible AI Policy".

Access success case (**career.two.coach** user):

The screenshot shows the Career Coach Assistant interface. The sidebar and main area are identical to the previous screenshot, but the AI response is different. It asks: "What courses do you recommend for medicine?". The response says: "Based on the available course information, there are no specific medicine-focused courses listed in the provided materials. The documents contain information about computer engineering, computer science, basic sciences, and engineering sciences curricula, but none specifically tailored for medicine or medical studies. [1] [2] Some science courses that might be relevant as foundational knowledge include: • CHEM 1151 and CHEM 1153 (General Chemistry for Engineers and Recitation) [1] • PHY101 (Introduction to Physics-I) [2] • PHY102 (Introduction to Physics-II) [2] • MAT103 (Mathematical Methods-I) [2] In the specialized areas, CSD352 (Computational Neuroscience) might be tangentially related to medical studies as it covers CNS and basic neurobiology, including neuroanatomy and neurophysiology. [2] Could you please clarify if you're looking for pre-medical courses, courses for a medical degree, or courses that complement medical studies from a specific discipline like computer science or engineering?". The search bar and footer are also present.

- **Content Moderation:** Global Controls list configured to block restricted keywords (e.g., Gambling, Casino).

The screenshot shows the 'Chat orchestration settings - new' page. It includes a note about enabling hallucination mitigation and a section for feature settings like allowing end users to upload files in chat content and use Amazon Q Apps. A 'Blocked words' section allows users to enter words to be removed from responses, with examples like Gambling, Casino, Self-harm, and Attack.

The screenshot shows the 'Global controls' page under 'Admin controls and guardrails'. It displays response settings (allowing end users to send queries directly to the LLM, fallback to LLM knowledge, enable hallucination mitigation), feature settings (allowing end users to upload files in chat content, use Amazon Q Apps), and a 'Blocked words' section with the same four examples as the previous screenshot. The sidebar on the left lists various Amazon Q Business features and actions.

Enhancements

Suggested improvements and future extensions of the application are summarized here.

The screenshot shows two side-by-side views of the AWS CloudFront Preview interface. The left view displays the 'Career Coach Assistant' application, which is an AI-powered career coaching assistant. It features a purple icon, the title 'Career Coach Assistant', and a subtitle 'AI-powered career coaching assistant'. Below this, there's a message: 'Your career goals matter. Let's explore training options and resources that match your strengths and aspirations.' A section titled 'Try these starter questions:' lists four options: 'Summarize meeting notes', 'Summarize a document', 'Analyze customer feedback', and 'Enhance document quality'. The right view shows the 'Customize web experience' panel. It includes sections for 'Title' (set to 'Career Coach Assistant'), 'Subtitle' (set to 'AI-powered career coaching assistant'), and a 'Welcome message' (containing the same introductory text). There's also a checkbox for 'Display sample prompts' which is checked. At the bottom of the panel are 'Cancel' and 'Save' buttons. The bottom of the screen shows the AWS navigation bar with 'CloudShell', 'Feedback', and other account details.

Publish and share the application
